

AMENDMENTS TO THE SPECIFICATION

Please replace the specification excluding the claims and abstract (34 pages) with the substitute specification excluding the claims and abstract (34 pages) submitted as an attachment to this paper. The substitute specification is presented in clean form, i.e., without markings to show changes relative to the immediate prior version of the specification of record. The immediate prior version of the specification of record is the specification as originally filed, and as amended by Preliminary Amendments filed on October 16, 2003, February 10, 2004, and February 26, 2004. Applicants also submit as attachments to this paper the specification as originally filed, marked-up to show removal of hand lettering therein, and copies of the three previously filed Preliminary Amendments. Applicants' rationale for submitting these items in response to the Notice to File Corrected Application papers is provided below in the **Remarks** section of this paper.

Attachments: Substitute specification (clean version)

Marked-up version of specification as originally filed

Copies of previously submitted Preliminary Amendments (3)

AMENDMENTS TO THE DRAWINGS

As requested by the Notice to File Corrected Application Papers mailed January 30, 2004, Applicants have attached replacement drawing sheets in compliance with 37 C.F.R. 1.84 and 37 C.F.R. 1.121 for Figures 23 and 24. The replacement drawing sheets replace the original drawing sheets that included Figures 23 and 24. The replacement drawing sheets correct problems identified in the original drawing sheets with respect to line quality, text legibility, and text height.

Attachment: Replacement Drawing Sheets for Figures 23 and 24
